

Third-Party Open Source Software Used By Npcap

Npcap (<https://npcap.com>) is a software library for packet capture and transmission on the Microsoft Windows platform. There is a free/demo Npcap which is mostly for personal use, and a commercial [Npcap OEM Edition](#) for companies who want automated deployment, commercial support, greater internal-use rights, or even to redistribute Npcap OEM within their products.

Npcap uses three third-party open source software components: Libpcap, Winpcap, and `ieee80211_radiotap.h`. All of these are open source with BSD-style licenses that allow for unlimited use and royalty-free redistribution within other software (including commercial/proprietary software). Some include a warranty disclaimer (relating to the original authors) and require a small amount of acknowledgment text be added to the documentation of any software which includes them (including indirectly through Npcap). An example of such text provided in the next section of this document. Since Nmap Software LLC is not the author of this third-party code, we can not waive or modify its software copyright or license. Npcap users and redistributors must comply with the relevant Npcap license (either the free/demo license or a commercial Npcap OEM license) as well as the fairly minimal requirements of the third-party open source software listed here. Each of the three components has a section later in this document detailing the software and providing its full license text.

Please note that all Npcap support, warranties and indemnification that we (Nmap Software LLC) offer to commercial customers apply to these third-party components and all other Npcap code. The warranty disclaimers in their license text just mean that the original library authors and maintainers aren't responsible for that support you buy from us instead.

This document covers **Npcap version 1.60**. Licensees or potential licensees who want this information for a different Npcap release should contact sales@nmap.com.

Anyone may redistribute this document in whole or part, including incorporating it into larger documents. In particular, redistributing this document along with Npcap OEM (for parties who hold an [Npcap OEM Redistribution License](#)) is often helpful to comply with attribution clauses of the software component licenses detailed herein.

Suggested Acknowledgment Text

To give credit where due and also comply with attribution clauses of the various 3rd party software component licenses detailed in this document, we suggest that [companies licensed to redistribute Npcap OEM](#) include this document itself along with their software and also include a statement like the one below in their documentation:

This program contains the Npcap OEM Windows packet capturing software (<https://npcap.com>) pursuant to a license agreement with Nmap Software LLC. Npcap OEM contains programming code from the Libpcap project (<https://www.tcpdump.org>) which is Copyright (c) by The TCPdump Group and its contributors. Npcap also incorporates code from the now-defunct Winpcap software (<https://winpcap.org>) which is Copyright (c) NetGroup, Politecnico di Torino, CACE Technologies, and The Regents of the University of California. In addition, Npcap contains an `ieee80211_radiotap.h` header file which is Copyright (c) David Young. Full license text and details for these 3rd party components are available in the Npcap-Third-Party-Open-Source.pdf file included with this program and/or available at <https://npcap.com/src/docs/Npcap-Third-Party-Open-Source.pdf>.

Libpcap Portable Packet Capturing Library

Description: Libpcap is a popular reference implementation of the pcap packet capturing API. It is produced by The TCPdump Group and supports Linux and Mac OS X systems (among others). Npcap implements this API for Microsoft Windows by combining the high-level open source libpcap API code with our own custom Windows driver that implements the low-level network operations. Our wpcap.dll library file is mostly libpcap code. We occasionally make our own fixes and changes to the libpcap code, but we have a great relationship with The TCPdump Group and try to submit all of our changes to them for incorporation in future libpcap releases.

Software URL: <http://www.tcpdump.org/>

Version used: 1.10

License Summary: Modified BSD license (3-clause) – allows free redistribution as long as you include a short attribution statement and warranty disclaimer somewhere in your documentation.

License Text: Libpcap is Copyright (c) by The TCPdump Group and its contributors. This license text was taken from <https://github.com/the-tcpdump-group/libpcap/blob/master/LICENSE> on August 25, 2020:

License: BSD

Winpcap Windows Packet Capturing Library

Description: Winpcap is an earlier (now abandoned) open source implementation of the pcap API for Windows. The last Winpcap release was made in March 2013. We created Npcap by starting with that abandoned code and updating it to support modern Windows NDIS API's and fixing well-known bugs and security issues. While Npcap has diverged substantially over the years, it still contains a substantial amount of original Winpcap code, so the Winpcap license must be followed. It is used by Nmap on Windows for raw packet reading during host discovery, port scanning, and OS detection. It is a derivative of LibPcap, so that license (see Libpcap section) must be followed as well. It is only needed and used on Windows.

Software URL: <https://www.winpcap.org/>

Version used: 4.1.3

License Summary: Modified BSD license (3-clause) – allows free redistribution as long as you include attribution statement and warranty disclaimer somewhere in your documentation. The fourth clause, which relates to attribution in advertising materials has been officially removed and revoked by the University of California, Berkeley:

https://ipira.berkeley.edu/sites/default/files/shared/docs/Advertising_clause_removed_from_BSD_license.pdf

License Text: This was taken from <https://www.winpcap.org/misc/copyright.htm> on March 11, 2016 and we made the following updates:

- Removed the “advertising clause” from University of California, Berkeley copyright statement because they have officially removed and revoked that as documented here: https://ipira.berkeley.edu/sites/default/files/shared/docs/Advertising_clause_removed_from_BSD_license.pdf
- Removed copyright notice from Kungliga Tekniska Högskolan because that code is no longer in Npcap.
- Removed copyright notice from Yen Yen Lim and north Dakota State University because that code is no longer in Npcap.
- Removed copyright notice from Digital Equipment Corporation because that code is no longer in Npcap.
- Removed copyright notice from WIDE Project because that code is no longer in Npcap.
- Removed copyright notice from Juniper Networks because that code is no longer in Npcap.
- Removed copyright notice from Daniel Hartmeier since that code is no longer in Npcap.
- Removed copyright notice from Carnegie Mellon since that code is no longer in Npcap.
- Removed the 1983 copyright notice from UC Berkeley since that code is no longer in Npcap. The notice from their 1990’s contributions is still there.
